

PTS-56227

REV 3.8
C6-57161 (A)
C6-57153 (B)

DEFINITION

PTS-56227 is a  Recognized two-component thermally conductive, two to one mix ratio by volume; four to one by weight, **room temperature cure** silicone encapsulant. It is designed for potting, encapsulation by casting of completed circuit boards, hybrid circuits, and power supplies, where flexibility, reparability, and high temperature resistance are required. Possible applications include automotive, telecommunications, transformers, cable end sleeves, capacitors, coils, insulators/bushings, transducers, and (re-enterable) telephone cable splicers

PRODUCT DESCRIPTION

Appearance	white liquid
Odor	Faint
Color	White

Property	Result	Methods
Viscosity	Part A 600 mPa's Part B 16,000 mPa's Mixed 2,500 mPa's	Brookfield HBT Spindle 27, 10rpm @ 25°C

Other information		
Flammability, UL™	UL 94 V0, Thickness 6 mm or higher	
Pot life time @ 25± 2°C	7 minutes	
Specific gravity @ 20°C (g/cm ³)	A= 0.97 B= 2.39 Mixed = 1.75	
Possible curing cycles (70F)	<ul style="list-style-type: none"> 15 minutes at room temperature, full properties develop after several hours. 	
Mix Ratio:	By Weight:	Part A 25 Part B 100
	By Volume:	Part A 50 Part B 100
Shelf Life	One year in original unopened containers.	

APPLICATION PROPERTIES

- Since **PTS-56227** has very good adhesion to most common circuit board materials, it does not require the use of primers, buffers, conformal coatings, or silicone gels that are needed for most applications.
- **PTS-56227** provides long-term circuit protection from about – 65°C to 150°C.
- **PTS-56227** in side by side dual cartridges of 50 ml, 200ml, 400ml, gallon and 5 gallon containers.

APPLICATION RECOMMENDATIONS

- For evaluation purposes: add four parts **PTS-56227 Part B** and one part **PTS-56227 Part A** at room temperature. Mix thoroughly. Degas to 0.5 mm Hg or less until all entrained air has been expelled (about 2-3 minutes).
- **PTS-56227** is designed to be applied by convenient two part cartridges or meter mix equipment.

TYPICAL PROPERTIES OF CURED PTS-56227™

The properties listed below were determined from measurements carried out in a limited number of tests. These properties are given as guidance, and do not constitute a guarantee. It will be for the user, in all cases, to carry out their own tests to determine whether **PTS-56227** is suitable for the user's particular application.

Property	Result	Methods
Shrinkage on Cure	<1%	
Shore A Hardness	50	ASTM D2240
Thermal Conductivity	1.0 W/M/K	CAL
Glass Transition Temperature	Tg 1: -64°C Tg 2: -48°C	TGA1
Weight Loss, (1 week at 150°C)	0.25%	
(Saturated) Steam Resistance, (72 hours, 15 psi steam, % weight gain)	1%	
Coefficient of Thermal Expansion	55 x 10 ⁻⁴ /°C	TMA1

STORAGE AND HANDLING

- Store **PTS-56227** in a cool dry place away from food, heat, moisture, direct sunlight, acidic, oxidizing agents, and peroxides.
- Avoid contact with other materials containing sulfur, tin, nitrogen compounds, including rubber, epoxies, polyurethanes, polysulfides, polyamides, and other silicone RTV's which may inhibit cure.
- Blanket opened containers of **PTS-56227** with dry nitrogen and closed tightly.

PRECAUTIONS IN USE

Refer to the material safety data sheet.

PACKAGING
